# Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 31st March, 1960

## REPORT

**Summary.** The birth-rate\* shows a slight decrease compared with the corresponding quarter of 1959 but is still above the average† of recent first quarters. The death-rate and marriage-rate are each below the average. The infant mortality rate is the lowest recorded for any first quarter. The death-rate for tuberculosis is little more than half the rate of five years ago. Maternal mortality is above the average.

**Live Births.** 25,226 births were registered in the quarter under review, 252 fewer than in the corresponding quarter of 1959. The rate per 1,000 population is 19·5, being 0·4 lower than the rate for the corresponding quarter of 1959 but 0·2 above the average. The birth-rate in the cities is 20·4, in the large burghs 20·9, and in the rest of Scotland 18·3. In individual areas the rate ranged in the cities and large burghs from 24·7 in Kilmarnock to 16·9 in Falkirk and in counties exclusive of cities and large burghs it ranged from 21·6 in Caithness to 12·7 in Berwick.

The proportion of illegitimate births, 4·3 per cent., is 0·4 higher than that for the first quarter of 1959 and 0·3 above the average.

Of the 25,226 births, 13,031 were of male children and 12,195 of female children, being 1,069 male births per 1,000 females. Births registered in January numbered 8,105, in February 8,169, and in March 8,952, the equivalent birth-rates being 18·4, 19·8 and 20·3 respectively.

**Stillbirths.** The number of stillbirths registered during the quarter was 625 and is equivalent to a rate of 24 per 1,000 total births (including stillbirths) which compares with 22 per 1,000 in the first quarter of 1959.

**Marriages.** The number of marriages registered, 10,273, is 255 more than for the first quarter of 1959. The rate per 1,000 population was 7·9. It is 0·1 above that for the corresponding quarter of 1959, but 1·0 below the average. The rate in the cities is 9·2, in the large burghs 8·8, and in the rest of Scotland 6·6. In individual areas the rate in the cities and large burghs ranged from 12·3 in Port Glasgow to 5·9 in Rutherglen and in counties exclusive of cities and large burghs it ranged from 10·1 in Clackmannan to 3·1 in Inverness and Zetland.

Of the 10,273 marriages, 1,845 were civil marriages contracted in registrars' offices, one was an irregular marriage registered on the authority of the Court of Session, and 8,427 were solemnised by a minister of religion. In the corresponding quarter of 1959 civil marriages numbered 1,932, those with a religious ceremony numbered 8,085 and there was also one irregular marriage.

## EXPLANATORY NOTES

\* Birth, death and marriage rates are calculated on the estimated population at 31st December, 1959;

† References to average or average rate are to the average rates for the corresponding quarters of the five years 1955-1959;

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Marriages registered in January numbered 1,750, in February 2,651 and in March 5,872, the equivalent marriage-rates being 4.0, 6.4 and 13.3 respectively.

**Deaths.** Deaths registered during the quarter numbered 17,185, and equalled a death-rate of 13.3 per 1,000 population. They are 3,862 fewer than were registered in the corresponding quarter of 1959. The rate is 3.2 less than in that quarter, and 1.5 below the average. The death-rate in the cities is 13.7, in the large burghs 12.6, and in the rest of Scotland 13.2. The rate in individual cities and large burghs ranged from 16.3 in Rutherglen to 9.9 in Airdrie and in counties exclusive of cities and large burghs it ranged from 20.6 in Zetland, to 10.9 in Clackmannan.

Deaths registered in January numbered 5,701, in February 5,949 and in March 5,535, the equivalent death-rates being 12.9, 14.4 and 12.6 respectively.

**Infant Mortality.** Deaths of children aged under one year numbered 730 and are equivalent to an infant mortality rate of 29 per 1,000 registered live births. This rate is 4 lower than that for the corresponding quarter of 1959 and 4 below the average. Among legitimate children the mortality was 29 per 1,000 births and among illegitimate children 35.

The infant mortality in the cities is 30, in the large burghs 33 and in the rest of Scotland 26. In the cities and large burghs individually it ranged from 68 in Arbroath to 7 in Inverness and in counties exclusive of cities and large burghs it ranged from 41 in Argyll to 13 in Ross and Cromarty. No deaths of children aged less than one year occurred in the Counties of Bute, Kincardine, Nairn, Peebles, Selkirk and Sutherland.

The neo-natal rate (deaths of infants under 28 days) was 19 per 1,000 live births and is 3 below that for the corresponding quarter of 1959.

**Causes of Death. Principal Epidemic Diseases.**—There were 42 deaths registered during the quarter which were attributed to the principal epidemic diseases, being 483 less than in the first quarter of 1959. The death-rate, 3 per 100,000 of population, is 38 lower than in the corresponding quarter of 1959 and 14 below the average. Of this quarter's total 31 were from influenza (510 in 1959), 9 from meningococcal infections (7) and 2 from whooping cough (0).

During the quarter no deaths were registered from acute poliomyelitis.

**Tuberculosis.** The 165 deaths from all forms of tuberculosis are 68 fewer than in the first quarter of 1959. 156 were ascribed to tuberculosis of the respiratory system and 9 to tuberculosis of other organs. The death-rate from all forms of tuberculosis is 13 per 100,000, that from respiratory tuberculosis being 12. The rate for all forms is 5 below that for the corresponding quarter of 1959, and 7 below the average. The rate for respiratory tuberculosis is 5 below that for the first quarter of 1959 and 6 below the average.

**Malignant Neoplasms.** Deaths from this cause numbered 2,694 and equal a rate of 208 per 100,000. These deaths are 74 fewer than in the first quarter of 1959, and the rate is 9 lower than in that quarter.

**Respiratory Diseases.** Deaths from bronchitis numbered 809 and from pneumonia (excluding pneumonia of the newborn) 654. The death-rates per 100,000 population are 63 and 51, which are appreciably below the average rates of 81 and 68 respectively.

**Maternal Mortality.** Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 13, and are equal to a rate of 0.5 per 1,000 live births. This rate is 0.2 higher than that for the corresponding quarter of 1959 and 0.1 above the average. Including stillbirths the maternal death-rate is 0.5 per 1,000.

**Violence.** Deaths from accidents, poisonings and violence numbered 754, and are equivalent to a death-rate of 58 per 100,000 of the population. In the corresponding quarter of 1959 the number was 811 and the rate 63.

308 of the deaths were from accidents in the home. The numbers are tabulated by causes, broadly grouped, and by sex and age, in the following table on page 5.

The death-rates from the main causes of death in the first quarter of 1960 are indicated in the following table. The comparable rates in the first quarter of 1959 and the average rates for the first quarters of the years 1955-1959 inclusive are also given for the purposes of comparison.

| Cause of Death                                       | Death-rates per 100,000 Population |                       |  |

## CLAIMS TO SICKNESS BENEFIT UNDER THE NATIONAL INSURANCE ACTS

The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 29th March, 1960 was 263,597. The number of such claims made at the 17 principal towns is shown below.

These figures represent the number of new claims made at Ministry of Pensions and National Insurance Offices in the towns named, and include a number of claims made by insured persons resident in the landward area served by these offices.

**Population Projection.** The table on the following page shows a projection of the population of Scotland by sex and age at five yearly intervals from 1959 to 1979. This projection has been prepared by the Government Actuary's Department in consultation with the Registrar-General.

## SCOTLAND—

## Estimated Total Population Mid-1959, projected to mid-1979 by sex and age.

Basis—Mid-1959 estimate of Total Population (including Scottish Armed Forces and Merchant Seamen at home and abroad but excluding Forces stationed in Scotland who are not of Scottish domicile.)

## Assumptions—

Mortality—Steady decline of death rates over the period to about one-half of the rates experienced in the years 1954-58 at ages under 45; and progressively less improvement at ages over 45.

Fertility—Births averaging 99,000 in first 5 years, 101,000 in next 10 years, thereafter rising to about 103,000 in 1979. Male to female ration 1.06.

Migration—Annual net loss of 20,000 (10,000 males and 10,000 females).

(Thousands)

## METEOROLOGICAL NOTES

Supplied by the Meteorological Office, Edinburgh

## JANUARY 1960

The weather of January was very changeable, the most marked fluctuation in temperature occurring in the third week when a short cold spell was followed by a very mild one.

Mean temperature for the month  $37.9^{\circ}\text{F}$  was  $0.4^{\circ}\text{F}$  below average. The warmest days were 21st-23rd, the highest readings being  $62^{\circ}$  at Isle of Rhum, and  $57^{\circ}$  at Edinburgh (Botanic Garden) and North Berwick on 22nd, also at Achnashellach on 23rd. The coldest days in most places were 17th-20th, with maxima mainly in the middle 30's, though in the Highlands some places reached only  $27-28^{\circ}$  on 19th and 20th. Minima were notably high on 22nd and 23rd being  $46-49^{\circ}$  in many places. The lowest minima occurred mainly on 20th and 21st, though the 10th was the coldest in the S.W. The lowest readings were  $-2^{\circ}$  at Dalwhinnie on 20th, and  $5^{\circ}$  at Braemar, Cannich and Glenshee Lodge on 21st. Ground frost was widespread on many nights, the lowest readings on the ground being  $-4^{\circ}$  at Dalwhinnie on 20th and  $-2^{\circ}$  at Braemar and Cannich on 21st.

Sunshine was a little below average in the east, but was well above in many western and northern districts, Baltasound (Shetland) and Kilmarnock having an excess of 15 hours. The sunniest places were Prestwick Airport and Campbeltown (63 hours) and Stranraer (62 hours).

Rainfall was above average in eastern districts of the mainland, but markedly so only along a narrow coastal strip southwards from Buchanness, where 150 per cent was recorded. Nearly all western districts had less than average, and West Perthshire, parts of Argyll and most of Shetland had less than half the average. The biggest falls occurred between 17th and 21st, 29th and 30th. On 19th Glen Tanar had 3.53 inches and Logie Coldstone 2.47, and on 30th Glenlochar had 2.78 inches and Auchencairn 2.64. Snow occurred widely 13th-21st and 28th-30th, and was reported lying in many places on these dates. Eastern districts were the worst affected, especially Aberdeenshire where depths of 2-3 feet were reported in places and severe drifting occurred, especially 18th-20th.

There were isolated reports of thunder on 1st, 13th, 17th and 19th.

Gales occurred in many places 18th-22nd and in some western districts on 3rd, 4th, 30th and 31st.

Fog was reported fairly widely 18th-19th and 26th-28th.

**Meteorological Notes (continued)****FEBRUARY 1960**

Apart from a few days at the beginning and end, the month was cold and rather wet or snowy, though with abundant sunshine in the middle part.

The mean temperature  $36.8^{\circ}\text{F}$  was  $2.3^{\circ}\text{F}$  below average. The warmest days were 1st-4th and 27th-29th, the highest readings being  $61^{\circ}$  at Elgin and Dunbar on 29th, on which day  $60^{\circ}$  was recorded at a number of places. The warmest nights were the 3rd, 4th and 29th with minima mainly in the middle 40's. The coldest days were the 17th and 18th with maxima near or below freezing in most places—on 18th temperatures reached only  $17^{\circ}$  at Dalwhinnie and  $20^{\circ}$  at Cannich. The lowest minima occurred mostly around the 18th on which day Grantown-on-Spey recorded  $-8^{\circ}$ , Cannich  $-7^{\circ}$  and Lairg  $-1^{\circ}$ . The lowest readings on the ground were  $-8^{\circ}$  at Cannich and  $-6^{\circ}$  at Braemar, but for a number of the Highland stations (including Grantown-on-Spey) records are incomplete owing to thermometers being buried in deep snow.

Sunshine totals were above average everywhere, a number of stations having an excess of 35 hours or more, several February records being broken or equalled. The sunniest places were Arbroath (129 hours), Campbeltown (126), Liberton, Edinburgh (122), Carnoustie, Dunbar and Dundee (Mayfield) (121).

Rainfall was a little below average over the N.W. mainland, most of Inverness-shire and north Argyll, but was above average elsewhere; some small areas in the N.E. and extreme south had twice the average. The wettest days were 1st-3rd, 24th and 26th, the largest daily totals being 3.56 inches at Kin-gairloch and 2.16 inches at Achdaliu (Loch Eil) on 2nd and 2.04 inches at Strathyre on 1st. Snow fell widely 10th-20th, and was reported as lying in many places 11th-24th while over the Highland area where depths of 1 to 2 feet were reported it lay to the 28th. During the period 14th-18th drifting blocked many roads in the north and on 17th and 18th parts of the south and west were also seriously affected.

There were isolated reports of thunder on 3rd, 12th, 14th-16th, and 21st.

Gales occurred fairly widely on 2nd and 3rd, 16th, 24th, and 27th.

Fog occurred in many places in the south and west on 6th and 26th. It was dense around Glasgow on the 6th.

**Meteorological Notes** (*continued*)**MARCH 1960**

Mild southerly winds prevailed for the first few days but it became colder on 6th as a continental airstream became established, and winds from an easterly point prevailed for the rest of the month, making it rather dull except in the N.W.

The mean temperature 42.0°F was about average. The warmest days were around the 5th and 22nd-24th, the highest readings being 66° at Cape Wrath on 5th and at Kinlochewe on 22nd, 64° at Achnashellach on 5th and 63° at Cannich on 22nd. The warmest night was that of 29th February/1st March, with minima mostly in the middle 40's. The coldest days in most places were 8th and 9th. On the 8th maxima of only 32° occurred at Dalwhinnie, Braemar, Glenlivet and Glenshee Lodge. The lowest minima occurred mostly on 4th, 9th, and around 25th-29th, 18° being recorded at Cannich on 26th, and at Glenlivet on 4th. The lowest readings on the ground were 9° at Glenmore Lodge on 26th, 10° at Lairg on 27th and 11° at Dalwhinnie on 30th.

Sunshine was below average except in the N.W. The sunniest places were Stornoway (130 hours) and Prabost and Duntuilin in Skye (125 hours). By contrast some eastern districts had only 50-70 hours, the total of 66 hours at Arbroath being 54 hours below average.

Rainfall was below average except in East Fife, South Angus, parts of South Perthshire and North Ayrshire. Much of the N.W. mainland and Shetland had less than 50% of average. The wettest days were the 1st-3rd, 8th-10th and 18th-20th. Very few daily totals exceeded an inch; the greatest of these were 1.70 inches at Ormsary (Argyll) on 18th and Ardlamont (Argyll) on 19th. Snow fell widely on 8th and 9th and at a few places on 3rd, 4th, 6th, 7th, 10th, 11th, 20th 28th-31st. 2-3 inches was reported lying at a few places mainly in the east between 8th and 10th.

There were only two isolated reports of thunder.

Gales occurred on 1st, 3rd-10th, 18th-23rd, but were chiefly confined to exposed western coastal districts.

Fog occurred at a few places on 3rd, 4th-5th, 8th-20th, 22nd, 24th, 28th and 31st.

# Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 30th June, 1960

## REPORT

**Summary.** The birth-rate\* shows a marked increase compared with the average† of recent second quarters.

The death-rate is below the average.

The marriage-rate is below the average and is the lowest since the second quarter of 1917.

The infant mortality rate is a little below the average.

The death-rate from tuberculosis is half the rate of five years ago.

Maternal mortality is below the average.

**Live Births.** 26,177 births were registered in the quarter under review, 321 more than in the corresponding quarter of 1959. The rate per 1,000 population is 20·2 and is the highest for a second quarter since 1948. It is 0·2 higher than the rate for the corresponding quarter of 1959 and 0·7 above the average. The birth-rate in the cities is 20·9, in the large burghs 21·1, and in the rest of Scotland 19·4. In individual areas the rate ranged in the cities and large burghs from 26·2 in Coatbridge to 17·3 in Kirkcaldy and in counties exclusive of cities and large burghs it ranged from 22·3 in Dunbarton to 12·6 in Berwick.

The proportion of illegitimate births, 4·5 per cent. is 0·1 higher than that for the second quarter of 1959 and 0·2 above the average.

Of the 26,177 births, 13,387 were of male children and 12,790 of female children, being 1,047 male births per 1,000 females. Births registered in April numbered 8,720, in May 8,972, and in June 8,485, the equivalent birth-rates being 20·4, 20·4 and 19·9 respectively.

**Stillbirths.** The number of stillbirths registered during the quarter was 554 and is equivalent to a rate of 21 per 1,000 total births (including stillbirths) which is the same rate as that in the second quarter of 1959.

**Marriages.** The number of marriages registered, 7,987, is 590 fewer than for the second quarter of 1959. The rate of 6·2 per 1,000 population is 0·4 below that for the corresponding quarter of 1959, and 0·7 less than the average. The rate in the cities is 7·0, in the large burghs 6·7, and in the rest of Scotland 5·3. In individual areas the rate in the cities and large burghs ranged from 11·6 in Inverness to 5·3 in Clydebank and Motherwell and Wishaw and in counties exclusive of cities and large burghs it ranged from 7·7 in Dumfries to 1·7 in Inverness.

## EXPLANATORY NOTES

\* Birth, death and marriage rates are calculated on the estimated population at 31st December, 1959;

† References to average or average rate are to the average rates for the corresponding quarters of the five years 1955-1959;

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Of the 7,987 marriages, 1,440 were civil marriages contracted in registrars' offices and 6,547 were solemnised by a minister of religion. In the corresponding quarter of 1959 civil marriages numbered 1,489 and those with a religious ceremony numbered 7,088.

Marriages registered in April numbered 3,063, in May 1,551 and in June 3,373, the equivalent marriage-rates being 7·2, 3·5 and 7·9 respectively.

**Deaths.** Deaths registered during the quarter numbered 14,767, and equalled a death-rate of 11·4 per 1,000 population. They are 383 more than were registered in the corresponding quarter of 1959. The rate is 0·3 more than in that quarter, but 0·1 below the average. The death-rate in the cities is 11·7, in the large burghs 10·7, and in the rest of Scotland 11·4. The rate in individual cities and large burghs ranged from 12·4 in Dumfries to 8·2 in Port Glasgow and in counties exclusive of counties of cities and large burghs it ranged from 20·5 in Bute to 9·1 in Clackmannan.

Deaths registered in April numbered 5,166, in May 5,131 and in June 4,470, the equivalent death-rates being 12·1, 11·6 and 10·5 respectively.

**Infant Mortality.** Deaths of children aged under one year numbered 673 and are equivalent to an infant mortality rate of 26 per 1,000 registered live births. This rate is the same as that for the corresponding quarter of 1959 and one below the five years' average. Among legitimate children the mortality was 25 per 1,000 births and among illegitimate children 46.

The infant mortality in the cities is 28, in the large burghs 28 and in the rest of Scotland 23. In the cities and large burghs individually it ranged from 48 in Stirling to 14 in Dumfries and Dumbarton and in counties exclusive of large burghs it ranged from 46 in Perth to 3 in Angus. No deaths of children aged less than one year occurred in the Counties of Berwick, Caithness, Kinross and Nairn.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is the same as that for the corresponding quarter of 1959.

**Causes of Death. Tuberculosis.** The 124 deaths from all forms of tuberculosis are 6 fewer than in the second quarter of 1959. 112 were ascribed to tuberculosis of the respiratory system and 12 to tuberculosis of other organs. The death-rate from all forms of tuberculosis is 10 per 100,000, that from respiratory tuberculosis being 9. The rate for all forms is the same as that for the corresponding quarter of 1959, and 3 below the average. The rate for respiratory tuberculosis is also the same as that for the second quarter of 1959 and 2 below the average.

**Principal Epidemic Diseases.** There were 50 deaths registered during the quarter which were attributed to the principal epidemic diseases, being 16 fewer than in the second quarter of 1959. The death-rate, 4 per 100,000 of population, is one lower than in the corresponding quarter of 1959 but one above the average. Of this quarter's total 42 were from influenza (50 in 1959), 4 from meningococcal infections (8), 3 from whooping cough (0) and 1 from streptococcal sore throat (1).

During the quarter no deaths were registered from acute poliomyelitis.

**Malignant Neoplasms.** Deaths from this cause numbered 2,738 and equal a rate of 212 per 100,000. These deaths are 25 more than in the second quarter of 1959, and the rate is 2 higher than in that quarter. Lung cancer accounted for 605 deaths as compared with 536 in the second quarter of 1959.

*Vascular Lesions of the Central Nervous System.* Deaths from this cause numbered 2,318, compared with 2,331 in the corresponding quarter and an average of 2,399.

*Heart Disease.* There were 5,036 deaths ascribed to this cause group, 228 more than in the second quarter of 1959 and 62 above the average. Arteriosclerotic heart disease, which includes coronary disease, accounted for 2,693 of the deaths, compared with 2,467 in the corresponding quarter and an average of 2,289.

*Respiratory Diseases.* Deaths from bronchitis numbered 441 and from pneumonia (excluding pneumonia of the newborn) 463. The death-rates per 100,000 population are 34 and 36 respectively which compare with the average rate of 32 in each case.

*Maternal Mortality.* Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 8, and are equal to a rate of 0.3 per 1,000 live births. This rate is 0.1 less than that for the corresponding quarter of 1959 and 0.1 below the average. Including stillbirths the maternal death-rate is 0.3 per 1,000.

*Violence.* Deaths from accidents, poisonings and violence numbered 707, and are equivalent to a death-rate of 55 per 100,000 of the population. In the corresponding quarter of 1959 the number was 664 and the rate 51.

235 of the deaths were from accidents in the home. The numbers are tabulated by causes, broadly grouped, and by sex and age, in the following table on page 5.

The death-rate from some of the principal causes of death in the second quarter of 1960 are included in the following table. The comparable rates in the second quarter of 1959 and the average rates for the second quarters of the years 1955-1959 inclusive are also given for the purposes of comparison.

| Cause of Death  | Death-rates per 100,000 Population |                        |  |

### CLAIMS TO SICKNESS BENEFIT UNDER THE NATIONAL INSURANCE ACTS

The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 28th June, 1960, was 216,712. The number of such claims made at the 17 principal towns is shown below.

| <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>28th June, 1960</i> |        | <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>28th June, 1960</i> |         |

|  |        |  | 152,296 |
|  |        |  | <hr/>   |

These figures represent the number of new claims made at Ministry of Pensions and National Insurance Offices in the towns named, and include a number of claims made by insured persons resident in the landward area served by these offices.

**METEOROLOGICAL NOTES****Supplied by the Meteorological Office, Edinburgh****APRIL 1960**

The month as a whole was rather mild and cloudy. The first half was wet but during the latter half rainfall amounts were mostly small.

Mean temperature  $48.4^{\circ}\text{F}$  was  $3.3^{\circ}\text{F}$  above average. The warmest days were around 18th-23rd and 26th-29th, the highest readings being  $65^{\circ}$  at Lochranza, Arran on 26th, and at Fort William on 27th and 28th;  $64^{\circ}$  was recorded at a number of places. The warmest nights were around the same dates with many night minima in the upper forties and a few in the lower fifties. The coldest days in most places were 1st-3rd, but in only a few places did maxima fail to exceed  $45^{\circ}$ . The lowest minima occurred on 1st in some north eastern districts but in most places on 16th and 17th, the lowest readings being  $21^{\circ}$  at Tarfside and Buddon Ness on 17th and  $23^{\circ}$  at Grantown-on-Spey on 1st and at Carsphairn on 17th. The lowest readings on the ground were  $15^{\circ}$  at Halkirk on 1st and at Lairg on 17th, and  $16^{\circ}$  at Glenlivet on 17th.

Sunshine was below average over all northern districts also Argyllshire and parts of East Lothian and Midlothian; over remaining districts it was a little above average. The sunniest places were Dunbar (174 hours), Tiree (172), Castle Douglas (165), Campbeltown (164), Prestwick Airport and Stranraer (159).

Rainfall was below average over South Fife, Midlothian, East Lothian and the eastern part of the Borders, also over much of the north mainland except Wester Ross and the parts of Inverness away from the east coast. Over the remainder of the country it was above average, notably so (200-250% of average) over Central Perthshire and part of Kirkcudbrightshire. The wettest days were 2nd, 12th and 13th, the largest daily totals being 3.38 inches at Gairloch, Inverness-shire, 2.98 at Loch Oich (South Laggan) and 2.78 at Fort William, all on 12th. Snow or sleet fell at a number of places between 11th and 16th and at a few places on 6th, 9th, 19th, 20th, 23rd and 30th but was nowhere reported as lying.

Thunder was reported at a number of places in the south on 10th, and in the north on 13th and 14th. There were isolated reports on 4th-6th, 12th and 15th.

Gales were widespread on 13th and 14th and occurred more locally on 2nd, 4th-6th, 10th, 12th, 15th, 20th and 21st.

Fog occurred at a number of places on 2nd-4th, and there were isolated reports on 7 other days.

**Meteorological Notes** (*continued*)**MAY 1960**

After a cold start the month was warm and in most places fairly dry. It was notably sunny on parts of the east coast.

Mean Temperature  $53.7^{\circ}\text{F}$  was  $3.8^{\circ}$  above average. The warmest days were 10th-12th, 16th, 17th, 26th and 27th, the highest readings being  $77^{\circ}$  at Achany (Lairg) on the 26th,  $74^{\circ}$  at Nairn on 10th, 26th, 27th, Fort William on 16th and 17th, Largs and Prestwick on 16th, Halkirk on 25th and at Elgin, Huntly, Dyce and Haddington on 26th. The warmest nights occurred around the same dates and also on 5th and 23rd, with minima mainly in the lower or middle 50's. The coldest day in most places was 1st when temperature did not rise above the middle 40's at several stations in the N.E. The lowest minima occurred mainly on 1st and 2nd though in a few places on 25th. The lowest readings were  $22^{\circ}\text{F}$  at Balmoral on 1st, Glenlivet and Tarfside on 2nd. The lowest readings on the ground were  $14^{\circ}$  at Glensauigh (Fettercairn) on 1st and  $15^{\circ}$  at Tarfside and Glenlivet on 2nd.

Sunshine was above average except in some W and SW districts, the southern part of Edinburgh and a small area at the mouth of the Clyde. The excess was most marked along the east coast from Arbroath to Rattray Head and in Orkney. The sunniest places were Arbroath (233 hours), Rattray Head (230), Tiree (227), Benbecula and Aberdeen (both Dyce Airport and Mannofield Reservoir) (225).

Rainfall was below average except over an area comprising the greater part of South Perthshire, Stirlingshire, Clackmannan and Kinross and small parts of adjoining counties, the driest area being the north-eastern counties including the north-eastern half of Inverness-shire. The wettest days were the 12th, 13th and 23rd, the greatest daily totals being 3.08 inches at Amulree, 2.70 at Ochil Hills Hospital and 2.41 at Callander, all on 13th. Snow or sleet was reported at a few places in the east and north on 1st and there were isolated reports on 2nd and 24th.

Thunder occurred in many places 14th-16th, and in a few places on 8th and 9th, with isolated occurrences on 10 other days.

Gales occurred at a few places between the 11th and 13th and there were isolated reports on 24th and 25th.

Fog was reported in places on 14 days, most of the reports however were between the 14th and 17th.

**Meteorological Notes (*continued*)****JUNE 1960**

The main features were anticyclonic spells at the beginning and end of the month and an intervening changeable west to southwest type. Relative to average rainfall varied considerably but mean temperatures and total sunshine were both well above the seasonal average.

At the main centres of population mean temperatures were mainly  $3^{\circ}$ - $4^{\circ}$  above average and it was the warmest June since 1940. In most districts the warmest weather came around the 4th, and between the 17th and 25th when readings in the 80's were reported. The highest were 85 at Grantown-on-Spey, 83 at Achnagoichan, 83 at Balcladaich (Cannich area)—all on the 24th and 83 at Kinlochewe on the 23rd. On the average, maxima of this order occur in June only once in five years. These high readings were in contrast to the considerably lower day temperature ranging from only  $50^{\circ}$  to  $60^{\circ}$  on the 8th-14th and in some districts during northerly winds in the last week. Night minima were mainly in the  $35^{\circ}$ - $45^{\circ}$  range during the month but fell to  $33^{\circ}$  at Dalwhinnie on the 19th and at Leadhills on the 30th. Thermometers exposed above short grass registered  $25^{\circ}$  (7 degrees of frost) at Achany, Lairg on the 15th, at Dalwhinnie on the 19th, at Castle Douglas on the 29th and at Carnwath on the 30th.

Except for a few eastern districts the greater part of the country had good sunshine records, many totals being between 40 and 60 hours above the usual June amounts. In many places it was the sunniest June since 1940. Rothesay, with 279 hours for the month had an excess of 92 hours and this excellent aggregate was equalled at Stranraer. Other good records were Kilmarnock (269), Campbeltown (263), Prestwick Airport (260), Castle Douglas (260), Turnberry (253) and Auchincruive (251).

Apart from the northwest tip of Sutherland, practically all the Mainland and the Islands northwest of the Caledonian Canal received more than the seasonal rainfall, but, to the south, although there were some areas with an excess, for the greater part rainfall was below average. A small region in the southeast had less than half the seasonal amount. Little rain fell in the first week and during the last ten days but falls were general during the intervening unsettled spell. Measurements for the 24 hour rainfall day (9 a.m.-9 a.m.) exceeding an inch were fairly numerous in the west on the 7th-9th. On the last, 3.56 inches fell at Torridon House and 2.50 at Applecross Gardens.

Thunder was widespread from 5th-15th and it occurred in places on five other days.

Gales were reported in many districts on the 12th, 28th and 29th and locally on the 5th, 7th, 8th and 16th/17th.

Early morning fog, mainly local, occurred on eleven occasions.

# Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 30th September, 1960

## REPORT

**Summary.** The birth-rate\* shows a marked increase compared with the average† of recent third quarters.

The death-rate is above the average.

The marriage-rate is above that for the third quarter of 1959 but below the average.

The infant mortality rate is a little below the average.

The death-rate for tuberculosis is half the rate of five years ago.

Maternal mortality is below the average.

**Live Births.** 25,054 births were registered in the quarter under review, 69 more than in the corresponding quarter of 1959. The rate per 1,000 population is 19·2 being 0·6 higher than the rate for the corresponding quarter of 1959 and 1·1 above the average. The birth-rate in the cities is 19·7 and in the large burghs 20·9. These compare with 18·1 for the rest of Scotland. In individual areas the rate ranged in the cities and large burghs from 27·2 in Airdrie to 16·0 in Kirkcaldy. In counties exclusive of cities and large burghs it ranged from 22·0 in Caithness to 10·8 in Bute.

The proportion of illegitimate births, 4·4 per cent., is 0·2 higher than that for the third quarter of 1959 and 0·1 above the average.

Of the 25,054 births, 12,776 were of male children and 12,278 of female children, being 1,041 male births per 1,000 females. Births registered in July numbered 8,483, in August 8,554, and in September 8,017, the equivalent birth rates being 19·3, 19·4, and 18·8 respectively.

**Stillbirths.** The number of stillbirths registered during the quarter was 57 and is equivalent to a rate of 22 per 1,000 total births (including stillbirths) which is the same rate as that in the third quarter of 1959.

**Marriages.** The number of marriages registered, 12,364, is 209 more than for the third quarter of 1959. The rate per 1,000 population was 9·5. It is 0·2 above that for the corresponding quarter of 1959, but 0·3 less than the average. The rate in the cities is 10·7 and in the large burghs 10·6. These compare with 8·0 for the rest of Scotland. In individual areas the rate in the cities and large burghs ranged from 17·8 in Inverness to 7·0 in Dumbarton. In counties exclusive of cities and large burghs it ranged from 12·9 in Dumfries to 3·5 in Inverness.

## EXPLANATORY NOTES

\* Birth, death and marriage rates are calculated on the estimated population at 31st December, 1959;

† References to average or average rate are to the average rates for the corresponding quarters of the five years 1955-1959;

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Of the 12,364 marriages, 2,064 were civil marriages contracted in registrars' offices. The remainder, 10,300, were solemnised by a minister of religion. In the corresponding quarter of 1959 civil marriages numbered 1,966, those with a religious ceremony numbered 10,188 and there was also one irregular marriage.

Marriages registered in July numbered 4,263, in August 3,676, and in September 4,425, the equivalent marriage-rates being 9·7, 8·3, and 10·4 respectively.

**Deaths.** Deaths registered during the quarter numbered 13,705 and equalled death-rate of 10·5 per 1,000 population. They are 805 more than were registered in the corresponding quarter of 1959. The rate is 0·6 more than in that quarter, and 0·5 above the average. The death-rate in the cities is 10·5 and in the large burghs 10·0. These compare with 10·6 in the rest of Scotland. The rate in individual cities and large burghs ranged from 11·7 in Inverness to 6·9 in Port Glasgow. In counties exclusive of counties of cities and large burghs it ranged from 18·6 in Bute to 8·5 in Midlothian.

Deaths registered in July numbered 4,426, in August 4,711 and in September 4,568, the equivalent death-rates being 10·0, 10·7 and 10·7 respectively.

**Infant Mortality.** Deaths of children aged under one year numbered 596 and are equivalent to an infant mortality rate of 24 per 1,000 registered live births. This rate is one less than that for the corresponding quarter of 1959 and two below the five years' average. Among legitimate children the mortality was 23 per 1,000 births and among illegitimate children 39.

The infant mortality in the cities is 25, in the large burghs 24, and in the rest of Scotland 22. In the cities and large burghs individually it ranged from 48 in Hamilton and Falkirk to 8 in Inverness, and in counties exclusive of large burghs it ranged from 57 in Nairn to 7 in Wigtown. No deaths of children aged less than one year occurred in the Counties of Sutherland and Zetland.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is the same as that for the corresponding quarter of 1959.

**Causes of Death—Tuberculosis.** The 94 deaths from all forms of tuberculosis are 15 fewer than in the third quarter of 1959. 83 were ascribed to tuberculosis of the respiratory system and 11 to tuberculosis of other organs. The death-rate from all forms of tuberculosis is 7 per 100,000, that from respiratory tuberculosis being 6. The rate for all forms is one below that for the corresponding quarter of 1959, and 4 below the average. The rate for respiratory tuberculosis is also one less than that for the third quarter of 1959 and 4 below the average.

**Principal Epidemic Diseases.** There were 14 deaths registered during the quarter which were attributed to the principal epidemic diseases, being 6 fewer than in the third quarter of 1959. The death-rate, one per 100,000 of population, is one lower than in the corresponding quarter of 1959 and two below the average. Of this quarter's total 6 were from influenza (7 in 1959), 4 from whooping cough (5), 3 from meningococcal infections (6), and 1 from measles (2).

During the quarter no deaths were registered from acute poliomyelitis.

**Malignant Neoplasms.** Deaths from this cause numbered 2,739 and equal a rate of 209 per 100,000. These deaths are 3 less than in the third quarter of 1959, and the rate is one less than in that quarter. Lung cancer accounted for 603 deaths as compared with 609 in the third quarter of 1959.

*Vascular Lesions of the Central Nervous System.* Deaths from this cause numbered 2,187, compared with 2,065 in the corresponding quarter and an average of 2,017.

*Heart Disease.* There were 4,632 deaths ascribed to this cause group, 408 more than in the third quarter of 1959 and 365 above the average. Arterio-sclerotic heart disease, which includes coronary disease, accounted for 2,474 of these deaths, compared with 2,254 in the corresponding quarter and an average of 2,081.

*Respiratory Diseases.* Deaths from bronchitis numbered 347 and from pneumonia (excluding pneumonia of the newborn) 343. The death-rates per 100,000 population are 27 and 26 respectively which compare with average rates of 18 and 23.

*Maternal Mortality.* Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 8, and are equal to a rate of 0.3 per 1,000 live births. This rate is 0.1 less than that for the corresponding quarter of 1959 and 0.2 below the average. Including stillbirths the maternal death-rate is 0.3 per 1,000.

*Violence.* Deaths from accidents, poisonings and violence numbered 659, and are equivalent to a death-rate of 50 per 100,000 of the population. In the corresponding quarter of 1959 the number was 663 and the rate 51.

208 of the deaths were from accidents in the home. The numbers are tabulated by causes, broadly grouped, and by sex and age, in the following table on page 5.

The death-rates from some of the principal causes of death in the third quarter of 1960 are included in the following table. The comparable rates in the third quarter of 1959 and the average rates for the third quarters of the years 1955-1959 inclusive are also given for the purposes of comparison.

| Cause of Death   | Death-rates per 100,000 Population |                       |  |

### CLAIMS TO SICKNESS BENEFIT UNDER THE NATIONAL INSURANCE ACTS

The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 27th September, 1960 was 182,768. The number of such claims made at the 17 principal towns is shown below.

| <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>27th September, 1960</i> |        | <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>27th September, 1960</i> |         |

|   |        |   | 127,440 |
|   |        |   | <hr/>   |

These figures represent the number of new claims made at Ministry of Pensions and National Insurance Offices in the towns named, and include a number of claims made by insured persons resident in the landward area served by these offices.

## METEOROLOGICAL NOTES

Supplied by the Meteorological Office, Edinburgh

## JULY 1960

The weather was cool and changeable and in parts of the east and south it was rather wet.

Mean temperature for the main centres of population,  $57.8^{\circ}\text{F}$  was  $0.9^{\circ}\text{F}$  below average. The only parts of the country where it exceeded the average were the Western and Northern Isles and the extreme north mainland. The warmest days were 1st-4th, 7th-8th, 24th and 28th-31st, the highest readings being  $74^{\circ}$  at Fort William on 7th,  $73^{\circ}$  at Dyce and Montrose on 24th and at Halkirk on 30th. The coldest days were the 1st, 5th, 6th and 21st-23rd. The lowest minima occurred mainly 1st-4th and 22nd-23rd,  $30^{\circ}$  being recorded at Halkirk on 4th,  $31^{\circ}$  at Tarfside on 3rd, and  $32^{\circ}$  at Glenlivet on 3rd while  $34-35^{\circ}$  was recorded at a number of places in the Highlands and the Aberdeen area on 2nd and 3rd. Ground frost occurred at a number of places on 1st-4th and at a few places on 10th, the lowest readings from thermometers exposed over short grass being  $22^{\circ}$  at Halkirk on 4th, and  $26^{\circ}$  at Achnagoichan on 1st, at Lairg on 2nd.

Over most central and southern districts sunshine was below average but all districts north of Aberdeen and also the Western Isles had more than the average, the excess being greatest in Orkney. The sunniest places were Kirkwall (198 hours), Wick (191), Tiree (184), Dunbar (179) and Kinloss (176).

Total rainfall was a little above average over a number of eastern coastal districts, south Perthshire and the Clyde area, also along the Border and over Galloway. Over remaining districts it was below average, the driest areas being central Inverness-shire and Orkney, with around 50% of the average. It was mainly dry in the east 1st-4th, and in the west on 1st and 2nd. Appreciable rainfall fell in one part or another on all days from 5th onward, though amounts were mainly moderate. Among the larger daily falls were 1.78 inches at Toward, Argyllshire on 5th, 1.65 at Glen Etive on 14th, 1.64 at Benmore (Forest School) on 16th and 1.58 at Aberfeldy on 7th.

Thunder was widespread on 7th and 13th and occurred in one place or another on 19 days, the highest number of days in any month since July 1953.

Gales were reported very locally in the west on 6th, 16th, 17th and 21st.

Local morning fog was reported 4th-8th, 17th-19th and on 28th.

**Meteorological Notes (*continued*)****AUGUST 1960**

The month was unsettled and thundery, with appreciable rainfall in one part or another on every day, but despite this sunshine records were good in many southern and western districts.

Except in one or two places in the S.W., mean temperature was below average, though not markedly so except along the south shore of the Moray Firth where the deficiency was around  $2\frac{1}{2}$  degrees. The warmest days were the 3rd, 6th, 22nd and 23rd, the highest readings being  $78^{\circ}$  at Pitlochry (Faskally), Renfrew, Largs and Helensburgh on 3rd and at Benmore (Younger Botanic Garden) on 3rd and 4th. The warmest nights were around 4th-6th and 22nd-25th with minima mainly in the middle or upper 50's, though in a few places some were as high as  $60-61^{\circ}$ . The coldest days were 10th-13th, 17th-19th and 31st. The lowest minima occurred mostly around the 8th, 13th-14th and 19th,  $30^{\circ}$  being recorded at Glenlivet on 13th and 14th,  $31^{\circ}$  at Glenshee Lodge on 13th and 14th,  $32^{\circ}$  at Braemar on 13th and at Logie Coldstone on 13th and 14th. Ground frost occurred at a number of places on 8th, 12th-14th and 19th with isolated reports on a few other dates. The lowest readings on the grass were  $25^{\circ}$  at Lairg and Tarfside on 18th and  $26^{\circ}$  at Glenlivet on 14th and at Dalwhinnie on 8th.

Sunshine was above average over the Northern and Western Isles, S.W. Scotland, the Borders, East Fife and Angus; elsewhere it was below though markedly so only in the counties of Inverness, Nairn and Moray. The sunniest places were Tiree (214 hours), West Freugh (212), Campbeltown (200), Prestwick Airport (198), Castle Douglas (197) and Auchincruive, Ayrshire (192).

Rainfall was below average over Shetland and Orkney, the Western Isles and over S.W. Scotland except for Galloway and South Ayrshire. In remaining areas it was above average, the wettest areas being Nairn, Moray, northern Inverness-shire and part of Easter Ross, where over 250% of average was recorded. The wettest days were the 24th and 25th; on the latter day a number of places had falls of over 3 inches, notably 3.58 inches at Dallas Lodge, Moray, 3.46 at Kellas House, Moray, 3.45 at Auchindoune, Nairn, 3.31 at Drynachan, Nairn, 3.05 at Cawdor Castle, Nairn, and 3.03 at Dalcross Airport and Glenmore Lodge. Severe flood damage occurred in Galloway and in the area south of the Moray Firth as a consequence of the rainfall on 24th and 25th.

Thunder was very prevalent, occurring at one place or another on all but 6 days. It was widespread generally on the 1st, 22nd and 25th and in the east on 13th.

Gales were reported locally in the west on 22nd, 25th and 26th.

Local morning fog was reported on 16 days, chiefly near the beginning and end of the month.

**Meteorological Notes** (*continued*)**SEPTEMBER 1960**

The month was quite sunny, with temperature about average. Though rainfall totals were mostly below average, the month could hardly be classed as 'dry' since some measurable rainfall occurred in one part of the country or another on practically every day.

Mean temperature for the month, based on the main centres of population, was 53.9°F, 0.2°F below the average. The warmest days were the 9th-11th, 17th and 18th, the highest readings being 72° at Gordon Castle and Stirling (Batterflats) on 10th, 71° at Elgin, Dyce and Haddington on 10th, at Dundee (Mayfield) on 9th and 10th, at Fyvie Castle and Banff on 11th, and at Fort William on 17th. The warmest nights occurred around the same dates, minima of 60-61°F being recorded at a number of places on the night of 10th/11th. The coldest days were mostly between the 26th and 30th with maxima in the lower or middle fifties. The lowest minima mostly occurred around the 21st and 26th-30th, 23°F being recorded at Cannich on 28th, 24°F at Glenlivet on 26th and at Grantown-on-Spey on 27th. The lowest readings on the grass were 18°F at Dalwhinnie on 21st and at Glenlivet on 26th, 19°F at Tarfside on 15th and 26th and at Lairg on 27th.

Sunshine was about average in the east but was above average elsewhere, markedly so on the west coast. The sunniest places were Turnberry with 178 hours (their highest September total since 1933 and second highest since records commenced in 1910), Prestwick Airport (166), Auchincruive, Ayrshire (162), Troon (159) and Duntuilim, Skye (157—the highest at that station since records began in 1934).

Rainfall was a little above average in south Aberdeenshire, Kincardine and North Angus, also in extreme S.W. coastal districts; elsewhere it was below average, the driest areas being Sutherland and part of Wester Ross and some small areas in the Central Lowlands, with just under 50% of average. Despite the overall deficiency the only days on which little or no rainfall occurred over the whole country were the 9th, 25th, 26th and 27th. The wettest days were the 2nd, 3rd, 10th, 13th and 14th. Among the heavier daily falls were 2.20 inches at Kinloch Castle, Isle of Rhum, on 10th and at Stranraer (Penwhirn) on 13th, also 2.11 inches at Leadhills and Bargrennan (Kirkcudbright), 2.09 at Kaim Dam (Renfrew), and 2.00 at Glenkiln Reservoir (Kirkcudbright), all on 13th.

Thunder occurred at a number of widely separated places on 3rd and 15th and there was one isolated occurrence on 14th.

Sleet showers were reported at Oban on 23rd.

Local morning fog was reported at one place or another on 18 days.

Gales were reported at exposed places on 11 days.

*Annual Subscription 12s.8d. including postage*

*NOTE.—In addition to the usual quarterly return of births, deaths and marriages, which begins on page 10, this Report provides on pages 2 to 9 a short preliminary return of the main population and vital statistics for the year 1960. The full statistics will in due course be given in the Registrar General's Annual Report. The figures now given are provisional but may be taken as fairly accurate.*

## Preliminary Return for 1960

The population and vital statistics for the year 1960 are given in Tables IA and IIA on pages 4 to 9 of this Report. The main features of the tables are briefly indicated below.

**Population.** The population resident in Scotland at 30th June, 1960, is estimated to have been 5,208,000.

The natural increase of the population in 1960 (excess of births over deaths) was 39,500. The net estimated migration was 32,000. 23,500 went to other parts of the United Kingdom and the 8,500 to countries overseas, mainly Australia, Canada, New Zealand and the United States of America.

**Births.** 101,292 live births were registered in 1960, a rate\* of 19·4 per thousand. This was 0·3 above 1959 and 0·7 above the average†. 1,052 boys were born for every 1,000 girls.

Stillbirths numbered 2,252 the same as in 1959, representing a rate of 21·7 stillbirths per thousand of all births (live and still). This is the lowest stillbirth rate yet recorded in Scotland.

**Marriages.** Marriages registered during the year numbered 40,101. This represents a rate of 7·7 and is 0·1 below that for 1959, and 0·5 below the average. The pre-war (1934-1938) average was 7·6. 32,921 of the marriages were solemnised by ministers of religion, 32,826 having been preceded by proclamation of banns or by publication of notice and 95 authorised by Sheriff's licence in accordance with the provisions of the Marriage (Scotland) Act, 1939. 7,179 marriages were contracted in the offices of Authorised Registrars and one was registered on the authority of the Court of Session. Civil marriages comprise 17·9 per cent of the total marriages.

**Deaths.** Deaths from all causes numbered 61,764 and equalled a death-rate of 11·9 per thousand. This rate is 0·3 below that for 1959 and 0·1 below the average. The average rate in the five years before the war (1934-1938) was 13·2.

Deaths of children under one year numbered 2,673, giving an infant mortality rate of 26·4 per 1,000 living births, two below that for 1959 and the lowest yet recorded in Scotland. It is almost one-third of the average of 77·3 in the five years before the war. The neo-natal rate (deaths of infants under 28 days) was 18·2 per 1,000 live births, which compares with 19·4 in 1959 and is also the lowest recorded in this age-group. Legitimate children had an infant mortality rate of 26, and illegitimate children of 41.

Table IIA shows the total number of deaths registered in Scotland during the year, classified by sex and cause, and also the number by age and cause.

### EXPLANATORY NOTES

In this Preliminary Return—

\* Birth, death and marriage rates are calculated on the estimated population of Scotland as at 30th June, 1960  
† References to an average are to the average over the five years 1955-1959.

A comparison of deaths by age-groups in 1960 and 1959 shows decreases in all the age-groups except 5-9 and 25-34. The greatest decreases were in age-groups 75-84, 65-74 and under 1.

The death-rate at ages under 45 was 1·9 per 1,000, and at ages 45 and over 30·7. In 1959 the corresponding rates were 2·0 and 31·6.

**Causes of Death.** The number of deaths from the principal epidemic diseases‡ was 136, 498 fewer than in 1959. The death-rate was 3 per 100,000. Most of the decrease was due to a fall in influenzal deaths which numbered 104 in 1960 compared with 583 in 1959. There were also 19 deaths from meningococcal infections (23 in 1959), 2 from measles (18), 10 from whooping cough (8), 1 from streptococcal sore throat (1), none from diphtheria (1) and none from typhoid fever (0). There were no deaths from acute poliomyelitis compared with one in 1959.

Deaths from tuberculosis (all forms) numbered 508, 68 fewer than in 1959. The death-rate was 10 per 100,000, 5 below the average. 472 of the deaths were from respiratory tuberculosis, 41 fewer than in the previous year, and the rate of 9 per 100,000 was 4 below the average. Deaths from non-respiratory tuberculosis at 36 were 27 fewer than in 1959.

Deaths from cancer numbered 11,031 and were one less than in 1959 but 241 above the average number of 10,790 for the years 1955-1959. Deaths from cancer of the respiratory system accounted for 2,548 compared with 2,451 in 1959 and the average number of 2,224.

Deaths from heart disease numbered 21,376 and were 254 more than in 1959. They accounted for 35 per cent. of all deaths.

From vascular lesions affecting the central nervous system there were 9,849 deaths against 9,862 in 1959, from diabetes 555 against 550, and ulcer in the stomach and duodenum 562 against 507.

Deaths from diseases of the respiratory system (not tubercular, malignant or influenzal) numbered 4,768 which were 922 fewer than in 1959. They included 2,010 from pneumonia (except of newborn) and 2,214 from bronchitis, the rates per 100,000 being 39 and 43 respectively. Compared with 1959 the number from pneumonia was 547 fewer and from bronchitis 342 fewer.

Deaths from diseases and accidents of pregnancy and childbirth numbered 34 as against 36 in 1959. This represents a maternal mortality rate of 0·3 per 1,000 births (live and still). This rate is the lowest ever recorded in Scotland.

Deaths from congenital malformations and diseases of early infancy numbered 2,119 and were 101 fewer than in 1959.

Deaths attributed to violence numbered 2,863 and are 3 more than in 1959. Of these 402 were ascribed to suicide, 691 to road transport accidents, 1,050 to accidents in the home and 720 to other forms of violence; the numbers from these causes in 1959 were 442, 634, 1,086 and 698 respectively.

In Table 1A will be found the main figures and rates for Scotland, cities, large burghs and remainder of counties, with individual figures for each area.

On page 4 will be found tables giving details of deaths from accidents in the home and transport accidents by sex, age and broad cause groups for the year 1960.

‡ See note on page 5.

# Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 31st December, 1960

## REPORT

**Summary.** The birth-rate\* shows a marked increase compared with the average† of recent fourth quarters.

The death-rate is above the average.

The marriage-rate is below that for the fourth quarter of 1959 but is the same as the average.

The infant mortality rate is below the average.

Maternal mortality is the lowest recorded for any fourth quarter.

**Live Births.** 24,831 births were registered in the quarter under review, 1,276 more than in the corresponding quarter of 1959. The rate per 1,000 population is 18·9 being 0·9 higher than the rate for the corresponding quarter of 1959 and 0·6 above the average. The birth-rate in the cities is 19·6, in the large burghs 19·8, and in the rest of Scotland, 18·1. In individual areas the rate ranged in the cities and large burghs from 24·2 in Coatbridge to 15·7 in Kirkcaldy and in counties exclusive of cities and large burghs it ranged from 24·2 in Caithness to 11·7 in Peebles.

The proportion of illegitimate births, 4·2 per cent., is the same as that for the fourth quarter of 1959 and is 0·2 above the average.

Of the 24,831 births, 12,713 were of male children and 12,118 of female children, being 1,049 male births per 1,000 females. Births registered in October numbered 8,674 in November 7,886, and in December 8,271, the equivalent birth-rates being 19·6, 18·4, and 18·7 respectively.

**Stillbirths.** The number of stillbirths registered during the quarter was 501 and is equivalent to a rate of 20 per 1,000 total births (including stillbirths) which is 3 below the rate for the fourth quarter of 1959.

**Marriages.** The number of marriages registered, 9,469, is 229 fewer than for the fourth quarter of 1959. The rate per 1,000 population was 7·2. It is 0·2 below that for the corresponding quarter of 1959, but is equal to the average. The rate in the cities is 8·1, in the large burghs 7·7, and in the rest of Scotland, 6·3. In individual areas the rate in the cities and large burghs ranged from 15·7 in Inverness to 5·2 in Coatbridge, and in counties exclusive of cities and large burghs it ranged from 11·6 in Dumfries to 3·9 in Kinross.

Of the 9,469 marriages, 1,827 were civil marriages contracted in registrars' offices and 7,642 were solemnised by a minister of religion. In the corresponding quarter of 1959 civil marriages numbered 1,861; those with a religious ceremony numbered 7,836.

## EXPLANATORY NOTES

\* Birth, death and marriage rates are calculated on the estimated population at 31st December, 1960;

† References to average or average rate are to the average rates for the corresponding quarters of the five years 1955-1959;

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Marriages registered in October numbered 4,521, in November 2,260, and in December, 2,688, the equivalent marriage-rates being 10·2, 5·3, and 6·1 respectively.

**Deaths.** Deaths registered during the quarter numbered 16,097 and equalled a death-rate of 12·3 per 1,000 population. They are 1,367 more than were registered in the corresponding quarter of 1959. The rate is 1·1 more than in that quarter, and 0·4 above the average. The death-rate in the cities is 12·5, in the large burghs 11·5 and 12·3 in the rest of Scotland. The rate in individual cities and large burghs ranged from 13·9 in Arbroath to 8·6 in Port Glasgow and in counties exclusive of counties of cities and large burghs it ranged from 20·5 in Bute to 9·5 in Moray.

Deaths registered in October numbered 4,876, in November 5,132, and in December 6,089, the equivalent death-rates being 11·0, 12·0, and 13·8 respectively.

**Infant Mortality.** Deaths of children aged under one year numbered 674 and are equivalent to an infant mortality rate of 27 per 1,000 registered live births. This rate is two less than that for the corresponding quarter of 1959 and two below the five years' average. Among legitimate children the mortality was 26 per 1,000 births and among illegitimate children 42.

The infant mortality in the cities is 28, in the large burghs 25, and in the rest of Scotland 27. In the cities and large burghs individually it ranged from 52 in Dumbarton to 8 in Port Glasgow, and in counties exclusive of large burghs it ranged from 74 in Wigtown to 6 in Caithness. No deaths of children aged less than one year occurred in the burghs of Arbroath and Inverness, or the Counties of Bute, Kinross, Nairn and Peebles.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is two below that for the corresponding quarter of 1959.

**Causes of Death.—Tuberculosis.** The 124 deaths from all forms of tuberculosis are 21 more than in the fourth quarter of 1959. 120 were ascribed to tuberculosis of the respiratory system and 4 to tuberculosis of other organs. The death-rate from all forms of tuberculosis is 9 per 100,000, that from respiratory tuberculosis being 9. The rate for all forms is one above that for the corresponding quarter of 1959, but 5 below the average. The rate for respiratory tuberculosis is two more than that for the fourth quarter of 1959 but 4 below the average.

**Principal Epidemic Diseases.** There were 30 deaths registered during the quarter which were attributed to the principal epidemic diseases, being 8 more than in the fourth quarter of 1959. The death-rate, 2 per 100,000 of population, is the same as that in the corresponding quarter of 1959 and 8 below the average. Of this quarter's total 25 were from influenza (15 in 1959), 3 from meningococcal infections (2), 1 from whooping cough (3), 1 from measles (1), and none from diphtheria (1).

During the quarter no deaths were registered from acute poliomyelitis.

**Malignant Neoplasms.** Deaths from this cause numbered 2,849 and equal a rate of 217 per 100,000. These deaths are 61 more than in the fourth quarter of 1959, and the rate is 4 more than in that quarter. Lung cancer accounted for 634 deaths as compared with 608 in the fourth quarter of 1959.

**Vascular Lesions of the Central Nervous System.** Deaths from this cause numbered 2,582, compared with 2,258 in the corresponding quarter and an average of 2,393.

**Heart Disease.** There were 5,640 deaths ascribed to this cause group, 491 more than in the fourth quarter of 1959 and 382 above the average. Arterio-sclerotic heart disease, which includes coronary disease, accounted for 3,029 of these deaths, compared with 2,737 in the corresponding quarter and an average of 2,543.

**Respiratory Diseases.** Deaths from bronchitis numbered 616 and from pneumonia (excluding pneumonia of the newborn) 551. The death-rates per 100,000 population are 47 and 42 respectively which compare with average rates of 41 and 39.

**Maternal Mortality.** Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 3, and are equal to a rate of 0.1 per 1,000 live births. This rate is 0.3 less than that for the corresponding quarter of 1959 and 0.4 below the average. Including stillbirths the maternal death-rate is 0.1 per 1,000.

**Violence.** Deaths from accidents, poisonings and violence numbered 729, and are equivalent to a death-rate of 56 per 100,000 of the population. In the corresponding quarter of 1959 the number was 705 and the rate 54.

308 of the deaths were from accidents in the home. The numbers are tabulated by causes, broadly grouped, and by sex and age, in the following table on page 13.

The death-rate from some of the principal causes of death in the fourth quarter of 1960 are included in the following table. The comparable rates in the fourth quarter of 1959 and the average rates for the fourth quarters of the years 1955-1959 inclusive are also given for the purposes of comparison.

| Cause of Death  | Death-rates per 100,000 Population |                        |   |

## CLAIMS TO SICKNESS BENEFIT UNDER THE NATIONAL INSURANCE ACTS

The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 27th December, 1960 was 254,789. The number of such claims made at the 17 principal towns is shown below.

| <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>27th December, 1960</i> |        | <i>New Sickness Benefit Claims<br/>in the 13 weeks ended<br/>27th December, 1960</i> |         |

|  |        |  | 178,445 |
|  |        |  |         |

These figures represent the number of new claims made at Ministry of Pensions and National Insurance Offices in the towns named, and include a number of claims made by insured persons resident in the landward area served by these offices.

## METEOROLOGICAL NOTES

Supplied by the Meteorological Office, Edinburgh

### OCTOBER 1960

The month was one of very marked contrast, broadly speaking between Eastern and Western Districts. Very dull conditions with heavy falls of rain prevailed in many parts of the East, while in the West from approximately Argyllshire northwards, sunshine figures were up to, and even above average in many places and rainfall was well below the normal amounts for October.

The Mean temperature for the month, based on the records of the main centres of population was 49.4°F., 1.0°F. above the average. In fact temperature was above the average in all districts. The warmest days were mainly in the period from 3rd to 6th, the highest readings being 66°F. at Pitreavie near Dunfermline on 4th. The warmest nights occurred around the same period with minima mainly in the low fifties, but 55°F. was recorded at Fort William and Onich on 3rd and 57°F. at Colmonell on 1st. The coldest days were around the period

**Meteorological Notes (*continued*)**

11th to 13th but at very few places was the maximum temperature ever below 45°F. Exceptions, however, included Glenlivet on 11th, 12th and 15th and Achnagoichan (Inverness-shire) on 13th, both of which recorded 43°F. The lowest minima occurred on 13th when Carnwath recorded 21°F. and Barr, Broughton and Carsphairn recorded 23°F. The lowest readings recorded on thermometers exposed over short grass were at Castle Douglas (16°F.), Blyth Bridge (17) and Carnwath and Bargrennan (18), all on 13th.

Sunshine was well below the average in eastern districts and above the average in most places in the West. Some remarkably low totals were attained in the East, a deficit of 50 hours or more from the average being common. Only 29 hours were recorded at Craibstone, 71 hours below its October average figure and the lowest October figure at that station since records began in 1924. Braemar's total of 16 hours was the lowest October figure there since at least 1933. Other low totals included Fyvie Castle, 20 hours, and Tarfside, 24 hours. The sunniest places were Benbecula with 98 hours, Tiree with 94 hours (10 hours above its average), Prabost (Skye) with 86 hours and Oban also had 86 hours (16 hours above its average).

Rainfall in much of the West (omitting the extreme S.W., which was just about average) was well below the average with 50% of average fairly generally. The driest area was around Southern and Western Inverness-shire. Glasdrum (Fort William) had only 13% of its normal amount. In the East from Moray Firth southwards it was a very different story with the Montrose and Aberdeen areas measuring over 250% of their normal October rainfall. The coastal strip of Berwickshire, Angus and also Western Aberdeenshire had 200% of the average and East Lothian, East Fife and East Perthshire over 150%. The extreme N.E. from the inner Moray Firth to the Shetlands was, however, below the October average for that area.

Rain fell at some time on every day of the month at Braemar and there were no days completely dry over any wide areas in the East. In the West, however, during the period 10th-17th mainly small and scattered amounts of rain were measured.

The wettest days in the West were 2nd and 3rd. Notable falls being 3.42 inches at Lochranza, 2.10 inches at Islay (Eallabus) and 2.02 inches at Glenbranter, all on 2nd.

In the East the wettest days were 23rd and 31st. Falls of over 2 inches were recorded at Glensauigh, near Fettercairn 2.52 inches and Glen Tanar 2.17 inches on 23rd. Montrose had 2.35 inches on 31st, while 2.38 inches fell at Sourhope on 9th. The monthly totals at Braemar (7.63 inches) was the highest recorded in any October since 1932. At Craibstone (9.35 inches) the highest since 1924 and at Marchmont (7.86 inches) the highest since 1906.

Thunder occurred on 9 days but was mainly scattered.

Sleet or snow fell on 7 days mostly over higher ground. There were no reports of snow lying.

Morning fog was reported from one place or another on 21 days.

Gales occurred in places on 12 days.

**Meteorological Notes (*continued*)****NOVEMBER 1960**

Apart from two short cold periods in the first and last weeks, temperatures for the month were up to or slightly above average, winds being predominantly from the south-west. Persistent rain from low-pressure troughs moving in from the Atlantic gave more than the normal amount of rain for November in the southern half of the country. Sunshine exceeded average except in the North and East.

For the main centres of population, mean temperature (42.4°F.) exceeded average by 0.1°. Departures were not large but reached one degree or more at Inverness (-1.0°), Kilmarnock (+1.2°), Tiree (+1.0°) and Logie Coldstone (-1.4°). On most days temperature rose to 45°-55° but reached 59° at Kinlochewe and Gordon Castle and 58° at Fort William, Kinloss and North Berwick—all on the 30th which was the mildest day practically everywhere. The coldest weather came with northerly winds from the 6th-9th and 27th-29th and on the 18th-20th when the airstream reached Scotland from northern latitudes. On these days readings rose in general to only 35°-40° and at night air frosts were reported, minimum temperatures falling to 16° (16 degrees of frost) at Glenlivet and 17° at Tarfside—both on the 29th. Ground frosts were quite widespread in the cold periods, thermometers exposed on the ground registering 7° (25 degrees of frost) at Tarfside and Glenlivet on the 29th, 10° near Halkirk on the 19th and 11° at Lossiemouth on the 8th.

The driest periods of the month were the 5th-8th, 17th-19th and a few days around the 27th. Apart from these, rainfall was frequent but generally not heavy except on two or three days. The heaviest falls in 24 hours were 2.24 inches at Glenafton Hospital and 2.43 at Garroch, Dalry (Kirkcudbrightshire)—both on the 10th. On the 30th, 2.36 fell at Leadhills and 2.35 in Strathyre. Totals for the whole month showed a moderate to large excess over average in a large area in the Southwest. Most districts in Orkney, the Moray Firth, Inverness-shire, Ross and Cromarty, Sutherland and Caithness had a deficiency which ranged from 10-40% below average.

Snow and sleet showers occurred during the cold periods between the 3rd and 9th and 26th to 29th.

Despite fairly frequent rain, sunshine totals were mainly above average but some places reported small deficiencies. Whereas Renfrew and Kilmarnock had an excess of about 20 hours, records were below average by 10-15 hours at Baltasound (Shetland) and at Craibstone, near Aberdeen. The sunniest places were Prestwick Airport (82 hours), Auchincruive, near Ayr (81), Kilmarnock (69), Leuchars (69) and Auchterhouse, Angus (68).

Thunder occurred at only two places—on the 2nd and 11th—but there was a good deal of early morning fog mainly in the second half of the month. Gales were reported on the 1st-4th, 9th-15th and 27th-30th.

Meteorological Notes (*continued*)

## DECEMBER 1960

Temperatures for the month have been below average in all districts, but in contrast, sunshine has exceeded the average in most places. Morning fog has been reported from many places and rather prolonged periods have occurred in southern and central districts.

For the main centres of population, the mean temperature ( $37.2^{\circ}\text{F.}$ ) was  $2.4^{\circ}$  below the December average. A number of places had deficiencies of over 3 degrees and these included Balmoral ( $-3.6^{\circ}\text{F.}$ ), Braemar and Fort Augustus ( $-3.5^{\circ}$ ), and Perth and Glenbranter ( $-3.2^{\circ}$ ). The warmest days were on the 1st and around the 15th and 17th and  $54^{\circ}$  was recorded at Inverness (1st), at Edinburgh, Royal Observatory (16th) and North Berwick (17th). The warmest nights occurred around the same periods and on the night of the 17th,  $49^{\circ}$  was recorded at Tiree and Rhuvaa, and  $48^{\circ}$  at Colonsay and Isle of Rhum. The coldest days were the 7th, 11th, 14th, 19th and 20th. A maximum day temperature of  $25^{\circ}$  (7 degrees of air frost) was reported at Grantown-on-Spey on the 14th,  $26^{\circ}$  (6 degrees of air frost) was reported from Broughton on the 14th, and  $27^{\circ}$  (5 degrees of frost) was recorded at Balmoral (7th), Dyce (7th), Peebles (14th) and Carnwath (20th). The lowest night temperatures occurred on the same dates and a minimum air temperature of  $11^{\circ}$  (21 degrees of frost) was reported from Glenshee Lodge in Perthshire (11th), Glenmore (11th), Grantown-on-Spey (15th) and Tarfside in Angus (7th). Ground frosts were widespread throughout the month and thermometers exposed on the ground registered  $3^{\circ}$  (29 degrees of frost) at Glenlivet on the 11th,  $5^{\circ}$  (27 degrees of frost) at Dalwhinnie on the 11th,  $7^{\circ}$  (25 degrees of frost) at Glenmore on the 11th and 20th and  $8^{\circ}$  (24 degrees of frost) at Tarfside on 7th, 11th and 19th.

Sunshine totals were above the average in most places but there were a few places with deficiencies. At Elgin there were 71 hours of sunshine, at Kinloss 67 hours, and at Dunbar and Forres 66 hours. Marchmont House in Berwickshire with 60 hours, and Gordon Castle in Moray with 59 hours were 26 and 25 hours above their averages respectively. Perth, however, with 21 hours had a deficit of 13 hours and Renfrew with 23 hours had a deficit of 5 hours.

Rainfall was above the average in most North-west, West and Southern districts but it was below the average in extreme South-west, and also in the North and in the North-east, north of the Tay valley. Places on the coast of the Moray Firth had amounts only about 40% of the normal. The driest spells in the North-west and West were around the 12th and 13th and on the 19th, while in the North-east, East and South only small amounts were reported around the 5th to 7th, 11th to 14th, 18th to 21st, and on the 30th and 31st. Christmas Day was a particularly wet day in most places and falls of over 2 inches were reported from the Ardgour district and at Glenbranter House in Argyllshire, and also at Auchen Castle in Dumfriesshire. Other heavy falls on that day were at Strathaven (Kype Reservoir  $1.96''$ ), Kaim Dam in Renfrewshire ( $1.93''$ ), Ardnadam in Argyllshire ( $1.90''$ ), Inveraray ( $1.77''$ ), Benmore ( $1.70''$ ) and Forrest Lodge in Kirkcudbrightshire ( $1.68''$ ). A fall of  $2.21$  inches was also recorded at Dunaskin in Ayrshire on the 4th.

Snow or sleet was reported from some place or another on 30 days and thunder on 15 days.

Aurora was observed on 17 days.

Morning fog was reported from one place or another on 29 days. The most prolonged periods being 6th to 9th and 13th to 20th when the southern and central districts were those most affected.

Gales were reported on 15 days.
